Yo como insectos,
babosas y caracoles.

I move by crawling and flying.

Yo me muevo arrastrandome
y volando.

I can make light.

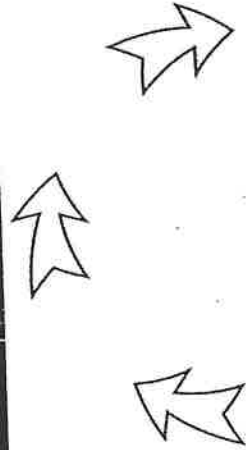

Puedo hacer luz.

What are the characteristics of insects?

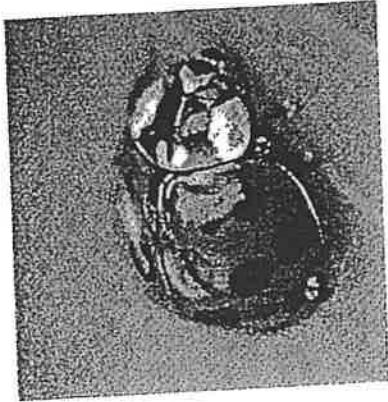

Exoskeleton:
skeletons on the
outside of their bodies

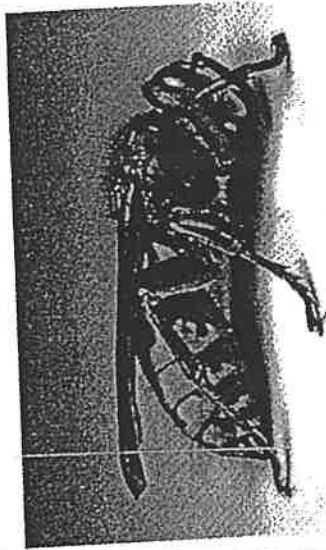

Life cycles

Most have
antennae

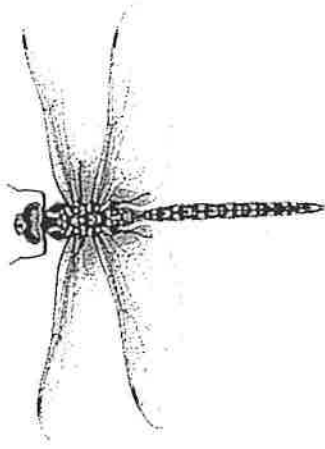

some are helpful
to people

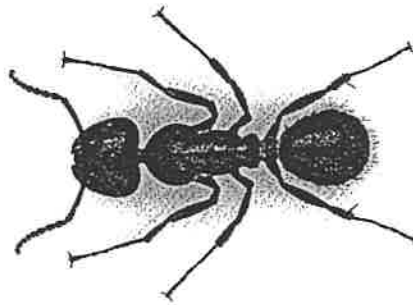

Bald faced hornet

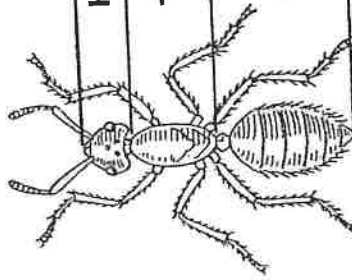

some are harmful
to people

Most have
wings

Have 6 legs

HEAD

THORAX

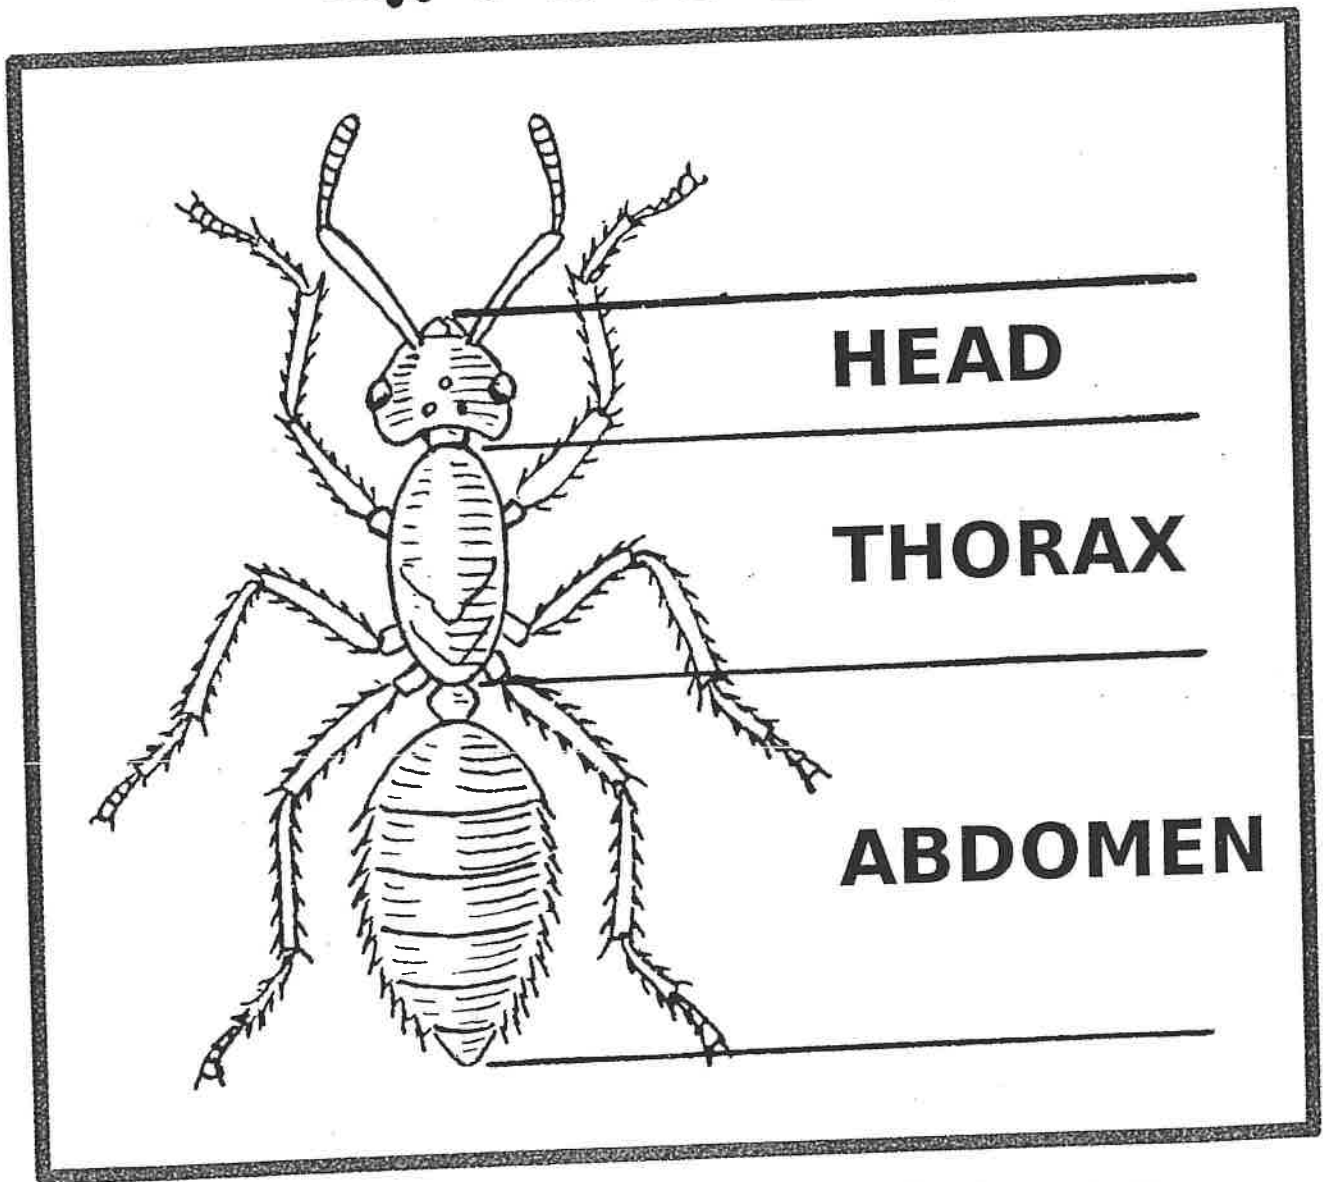

ABDOMEN

Have 3 body
sections

Jointed legs

What are the 3 body sections of an insect?

Head: where the eyes, mouth, and antennae are.

Thorax: Typically, the legs and wings are attached here.
All insects have 6 legs – 3 on each side of the thorax.

Abdomen: Inside the abdomen is the insect's stomach, heart, and the excretory system that allows insects to go to the bathroom.
